

The Mike Austin Power Golf Swing

The best drive for you is one that gives you the proper vertical launch and backspin when you swing up into the ball at a 5-degree up angle.

Catching the ball on a slight upswing increases launch, carry and distance.

Hitting up on the ball means you're not hitting down, so you automatically produce less backspin—one of the key parameters for optimum launch.

CLUBHEAD SPEED (MPH)	ATTACK ANGLE (degrees)	CARRY DISTANCE (yards)	TOTAL DISTANCE (yards)
75	-5 (down)	145	175
	0 (flat)	156	188
	+5 (up)	167	198
90	-5	195	225
	0	208	238
	+5	221	252
105	-5	243	273
	0	259	291
	+5	274	305
120	-5	291	322
	0	309	339
	+5	326	355

The Swing Factor Will Increase Your Angle of Attack +5 Degrees and Club Head Speed adding 30-50 Yards to Your Drives Guaranteed!

Swing studies involving hundreds of professional and amateur swings prove that catching the ball at the start of your upswing increases carry distance and total distance for all club head speeds. Only by attacking the ball at a 5-degree up angle will you produce the right combination of vertical launch angle and backspin increasing your distance of your drives.

Increasing your driver angle of attack and club head speed is easy with the Swing Factor. You will learn simple swinging exercises with the Swing Factor demonstrated in The Mike Austin Power Secrets DVD increasing your angle of attack and as a bonus you will also learn the Mike Austin "Power Throw" and "Power Pivot" increasing you club head speed.

Now for the first time ever you can add 30-50 yards to your drives. In as little as 5 minutes day, training with the Swing Factor will optimize your swing adding angle of attack and club head speed to your driver swing producing longer and straighter drives.

The Swing Factor comes with a 30 day No Risk Money Back Guarantee. Order Yours Today!
